

QuadConnect — Entity Relationship Diagram

The Connectors • Team 13 • P1-A1 Part 4 • Django app connect
8 models • 5 multi-field UniqueConstraints • CASCADE / PROTECT / SET_NULL demonstrated

Legend

PK primary key FK foreign key U unique
UC multi-field UniqueConstraint
Meta default ordering

on_delete

CASCADE child cannot exist without parent
PROTECT delete blocked to preserve history
SET_NULL optional link; parent removal is safe

M2M: StudentProfile ↔ Interest, realised explicitly through ProfileInterest so a pick can carry weight.
